

SDG Quickscan

Clear and accessible communication on your company's sustainability impact

The 17 Sustainable Development Goals (SDGs) set by the United Nations provide a strong framework for integrating sustainability into your business. Newtonone has committed to these goals to strengthen our internal sustainability strategy and communicate towards our employees and clients. We can help you identify the SDGs where you have the greatest positive and negative impact – supported by solid justification – to reap the same benefits.

What is the added value of the SDG Quickscan?

- Equips you to answer questions from your stakeholders
- Provides clear insight into ESG-impacts, risks and opportunities
- Strengthens your reputation towards stakeholders such as clients and new employees
- Helps improve access to (green) capital
- Differentiates you from your competition
- Contributes towards building a future-proof business

Our approach

During an interview, we dive deeper into your organization and walk through our SDG Quickscan. This interview lasts a maximum of two hours. Afterwards, we deliver a report with an overview of your impact scores across all SDGs. In addition, we offer advice on the best way to communicate your results.

Your investment

Access to our SDG Quickscan and our knowledge and expertise costs €1,500 (ex. VAT). Additionally, the interview will take a maximum of two hours of your time.

Want to know more?

Newtonone's ESG team has extensive experience in sustainability consulting and can connect you with the broad, multidisciplinary expertise of our colleagues. Feel free to contact us to explore opportunities in ESG reporting and strategy. We are happy to help!
